

# Mobile App Development for Aviation Company

## PROJECT DETAILS

📁 Mobile App Development

📅 Jul. 2022 - Oct. 2022

💰 \$50,000 to \$199,999

“*Everything was well organized.*”

## PROJECT SUMMARY

Appers for Cloud Services & Data Center Providers developed mobile applications in Flutter for an aviation company. The team also utilized Symphony for admin panels and Firebase for analytics.

## PROJECT FEEDBACK

Appers for Cloud Services & Data Center Providers successfully built and launched functional mobile apps ahead of schedule, meeting the client's expectations. An organized partner, they collaborated primarily on Jira and Slack. Overall, they delivered what they committed at a fair price.

## The Client

Please describe your company and your position there.

I'm the head of IT at a major aviation and flight support company, managing the tech related subjects for our daily overflights' requirements

## The Challenge

For what projects/services did your company hire Appers for Cloud Services & Data Center Providers, and what were your goals?

The industry has multi-level communication channels for flights navigation, clearance, landing arrangements, Appers helped us in streamlining all departments and communications with our clients through the B2B platforms and app which lowered our OPEX and increased our customers satisfaction.

**Muhammad Nabhani**

Senior IT Manager, MixJet  
Aviation & Flight Support FZE

### CLIENT RATING

**5.0**

Overall Score

Quality: 5.0

Schedule: 5.0

Cost: 5.0

Would Refer: 5.0

## The Approach

How did you select this vendor and what were the deciding factors?

Appers won the RFP by complying to all our requirements, beside their interesting commercial proposal and milestone payments proposal.

Describe the scope of work in detail, including the project steps, key deliverables, and technologies used.

- 2 Mobile Apps development in Flutter
- 
- Super Admin development in Symfony
- 
- Analytics and Firebase
- 
- Debugging, testing.
- 

How many resources from the vendor's team worked with you, and what were their positions?

Total of 6 people:

- 1 UX designed
- 
- 2 frontend developer
- 
- 1 Admin developer
- 
- 1 Project Manager
- 
- 2 QA members
- 

## The Outcome

Can you share any measurable outcomes of the project or general feedback about the deliverables?

The project was successfully delivered and launched 1 week ahead of the agreed schedule, functioning as expected and proposed.

Describe their project management style, including communication tools and timeliness.

Project management was done through Adam, we had weekly calls sharing the requirements and outcomes. Everything was well organized. Jira for tracking was used along with Slack for communication

What did you find most impressive or unique about this company?

They don't need to be monitored or tracked, they deliver what they committed to with the lowest rate of complications or requirements from the customer side.

Are there any areas for improvement or something they could have done differently?

NA, was really a good experience working with them.
